

Rishit Agnihotri

925-998-5620 | rishitagni@gmail.com | Bay Area, CA | U.S. Citizen

EDUCATION

UC Santa Cruz

Bachelor of Science in Computer Science

- **GPA:** 4.0/4.0

Expected Graduation: June 2028

Santa Cruz, CA

EXPERIENCE

Machine Learning Intern

Borde Inc.

June 2025 – Sept. 2025

Pleasanton, CA

- Optimized Vision Transformer models across 10 iterative training cycles, **increasing overall precision by 7% through rigorous data annotation protocols.**
- Architected a training dataset batch by utilizing OpenRefine to execute complex data cleaning and normalization on food-based imagery, eliminating label noise and redundant features across 2,000+ entries

Undergraduate Researcher

UCSC Systems Security Lab

Dec. 2025 – Present

Santa Cruz, CA

- Ported ripgrep to Twizzler OS and executed memory-safe OS object migrations in Rust, validating system reliability through 10+ rigorous QEMU tests.
- Contributed to the Twizzler OS open-source repository by developing a static site server and adapting directory traversal for the Twizzler runtime, enabling native web hosting/search capabilities within the OS.

CV Neural Explanations Researcher

AIEA Lab

March. 2025 – Present

Santa Cruz, CA

- Orchestrated large-scale model inference and training by **deploying neural network architectures onto the Nautilus (NRP) Kubernetes cluster**, leveraging Persistent Volume Claims (PVCs) and S3-compatible storage to handle C.V datasets.

Consultant

180 Degrass Consulting

April. 2026 – Present

Santa Cruz, CA

- Analyzed 5+ industry case studies to identify market trends and inform data-driven marketing strategies.
- Spearheaded direct outreach to local Santa Cruz companies to gather qualitative market insights and build strategic partnerships.

PROJECTS

W.H.Agent | *Turborepo, NPM, Oclif*

May. 2026 – Present

- Engineered a developer-first AI security CLI tool, mitigating malicious prompt-injection attacks across 20+ scanned agents by implementing custom AST intra-procedural taint-tracking algorithms.
- Delivered the solution to 5,000 users by publishing `wh-agent-cli@1.1.0` on npm and mirroring the repository on GitHub for open source. Install: `npm install -g wh-agent-cli`

KeyGuard | *Python, SciPy, Supabase*

Jul. 2025 – Present

- Engineered a biometric security widget with ~85% accuracy, leveraging a custom SciPy algorithm combining Mahalanobis and Manhattan distances across 28 typing features with **10+ testing users**. Install: `github.com/Twix1288/KeyGuard`

CERTIFICATES

PCEP™ – Certified Python Programmer

Cisco Cloud Computing and Security (CSPP)

CodeAcademy - Computer Science Career Path

Amazon Web Services: AWS CloudQuest: Cloud Practitioner

TECHNICAL SKILLS

Languages: Python, JavaScript (Node.js, React), SQL (PostgreSQL, MySQL), Rust, Java, C++

Developer Tools: OpenCV, AWS, PyTorch, TensorFlow, Supabase, Git/GitHub, Docker, Notion, Agile, Bazel, Kubernetes, Docker

Libraries: NumPy, Matplotlib, SciPy, pandas
